

Goodnature®

M-1

M-1

Fully

## CRAFT THE WORLD'S GREATEST JUICE, ONE GLASS AT A TIME.

The M-1 is the first commercial juice press built specifically for juice on-demand. No longer do your customers have to choose between “fresh” or “cold-pressed”—now they can have both. The first juice press that requires no cleaning between recipes.

### HERBIVORE™ GRINDER

Our patent pending grinder loves kale just as much as it loves apples, ginger, and even almonds, making it the most versatile grinder ever created.

### WHOLEFRUIT™ HOPPER

With a 3.5 inch wide mouth, there's no need to cut or peel most fruit and vegetables. Easily feed Herbivore™ handfuls of kale, whole lemons, and more.

### READYGRIND™ TECHNOLOGY

Our new patent pending technology allows going from one recipe to another without cleaning, in a matter of seconds.

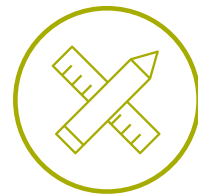

### FRESHFILTER® PRESS BAGS

Compostable, biodegradable press bags made from renewable resources. Single use bags cut down on labor time and help protect your customers from food-borne illness.

### PRESSAFE™ INTERLOCKS

Grinder and press are fully enclosed while operating. This helps protect the juice from contamination, and the operator from injury.

### ELEGANT DESIGN

A beautifully hand-crafted machine. Sweeping curves and rugged materials give the iconic Goodnature look. Several color options to choose from.
